📍 Kolhapur

👤 SUMMARY

A strong foundation in design and software development is demonstrated through innovative projects, reflecting a passion for creating user-centric solutions. An eagerness to contribute to meaningful advancements in technology is evident, along with a commitment to enhancing user experiences. Hands-on experience in Python and UI design, combined with a proactive approach to problem-solving, align with the goals of fostering impactful technical solutions in a dynamic environment.

🚩 KEY ACHIEVEMENTS

● Optimized Salon Operations

Enhanced salon efficiency by 40% with Python-based management system.

● Streamlined Budget Management

Achieved 25% faster budgeting with smart expense tracking app.

● Awarded Best Artwork

Received Best Artwork award among 150+ participants in art event.

🎓 EDUCATION

KIT's College of Engineering Kolhapur (Empowered Autonomous)

01/2024 - 01/2028

Computer Science & Business Systems

📝 PROJECTS

BellaDesk – Salon Management Desktop Application

10/2025 - 11/2025

Location

BellaDesk is a lightweight Python-based Salon Management System designed to simplify daily salon operations including appointments, staff management, billing, reporting, and basic analytics. Built using Tkinter, the app delivers a fast, offline, and user-friendly experience tailored for small to medium-sized salons.

- Designed and developed a full-featured desktop GUI application using Python

Orbitronics – E-Commerce Product Page

11/2025 - 11/2025

Location

Created a high-fidelity e-commerce concept design for Orbitronics, a futuristic tech brand. The design focuses on modern aesthetics, balanced composition, and visual storytelling to communicate innovation through layout and color. Built as a single creative frame in Figma, the project demonstrates a strong sense of brand identity, typography hierarchy, and component alignment without relying on multiple pages or prototypes.

- Designed a cohesive visual flow around a single hero product concept
- Used structured spacing, contrast, and depth to establish futuristic appeal
- Crafted consistent UI elements and a product-centric visual experience
- Focused on composition, typography, and layout harmony

Trackify – Smart Budget Management App

10/2025 - 10/2025

Location

Trackify is a modern web application designed to simplify personal finance management through intelligent automation and clean UI design.

- Secure user authentication for personalized dashboards
- Expense tracking with category-wise inputs and descriptions
- Real-time analytics showing total, monthly, and top-category spending
- Interactive dashboard to visualize financial habits
- Auto-categorization and smart insights for better budgeting
